Physical disability - Congenital deformities of feet. **CID Q66**

Professional Summary

Started my career at [Avanade](#) in 2018 while pursuing a degree in Analysis and Systems Development. Contributed to projects for a natural resources company and a leading healthcare organization, gaining expertise in SQL, ServiceNow, APIs, Kubernetes, SLA management, crisis response, and client engagement. Founded [Programação Sem Pantim](#), a nonprofit initiative supporting career changers.

Joined [Faculdade Descomplica](#) as a Full Stack Developer in 2021, later selected for [Thoughtworks University](#), where I collaborated with international teams from the US, Canada, Ecuador, and Chile. Served as an instructor for the [Conexões Periféricas](#) project, teaching web programming to underprivileged youth.

Currently working on a large-scale project for a US-based pharmaceutical company, focusing on a Java backend (Spring Boot, JUnit), a React + Next.js frontend, and PostgreSQL.

Skills

- Programming Languages: Javascript, TypeScript, Java
- Technologies: HTML5, CSS3, Git, SpringBoot
- Specific Javascript Skills: Node, React, NEXT.JS
- API Gateways: SENSEDIA
- Kubernetes/CLOUD: OPENSIFT
- CI/CD: Argo CD

 - Número de autenticação: 1604.0809.0606.0514.3880.1410

Work Experience

Thoughtworks

Consultant Developer - April/2022 to [Current company]

At my current role, I participate in daily meetings, deliver code aligned with acceptance criteria, showcase features to clients, create tests, facilitate retrospectives, organize releases, propose improvements and strategies based on daily observations, and mentor new team members.

Languages: JavaScript, Java

Libraries: React, Styled Components, React Test Library, Jest, JUnit

Code Versioning: Github, Azure

CI/CD: Github Actions + Google Cloud Platform, Jenkins, ARGO CD

Agile Management: Trello, Azure Devops, JIRA

Faculdade Descomplica

Full Stack Developer - December/2021 to February/2022

Worked on distance education projects using the following technologies:

Frameworks: React, VueJS

Code Versioning: Git and Github

CI/CD: Jenkins + Spinnaker

Database: PostgreSQL

Agile Management: Shortcut (old Clubhouse)

Avanade

Senior Software Engineer - May/2018 to December/2021

Worked on a project supporting corporate APIs, responsible for bug fixes and improvements in NodeJS, Angular, and C# projects, with daily use of the following tools:

Code Versioning: Git and GitLab

API Monitoring: SENSEDIA (API Gateway)

Container Monitoring: OPENSIFT (Kubernetes)

Database: SQL Server

IDE: Visual Studio

Devops: Azure Devops
